Professional Summary

Full Stack Developer with a track record of shipping scalable applications. Developed a multi-platform AI travel application and enterprise backend modules serving 800+ users, leveraging relational data modeling and REST APIs.

Technical Skills

Languages: Java, Python, C++, TypeScript, JavaScript, HTML, CSS, SQL

Frameworks & 3D Web: React, Node.js, Flutter, WebGL, Three.js, Spline 3D

Backend & Databases: Firebase, Supabase, MySQL, Relational Data Modeling, Database Design & Management

AI & Data: Large Language Models (LLMs), Retrieval-Augmented Generation (RAG), Prompt Engineering, OCR (Tesseract), Vector Databases

API & Practices: REST API Design & Integration (Gemini, Razorpay, Google Maps, Supabase), Object-Oriented Programming (OOP), Agile & Scrum, Debugging & Troubleshooting, System Design (Learning)

Developer & AI Tools: Git, GitHub, VS Code, Postman, Antigravity, Claude Code, Gemini CLI

Professional Experience

Automatic Infotech

Jun 2024 – Feb 2025

Software Development Intern

Pune, India

- Contributed as part of a development team to build a self-paced employee training platform on the Moodle LMS framework, customized with HTML, CSS, and JavaScript, replacing a costly and inflexible third-party tool.
- Personally, built the certificate generation module and an employee ID management system, alongside platform features supporting lectures, quizzes, and assessments.
- Drove adoption to roughly 70% of the company (~800 employees), enabling staff to upskill and earn certificates and badges.
- Integrated Antigravity, Gemini CLI, and Claude Code into daily development workflow to accelerate coding and debugging cycles.

Freelance Web Developer

Mar 2025 – Present

Self-Employed

Pune, India

- Delivered 5 client websites end-to-end: 3 business websites built with HTML, CSS, and React, and 2 immersive 3D web platforms built with the MERN stack, WebGL, Three.js, and Spline 3D.
- Tracked performance via Google Analytics, achieving a 35% increase in average user engagement across delivered sites.

Key Projects & Research

Mahayatri – AI-Powered Travel & Local Guide Platform

Oct 2025 – Present

- Designed a 12-table relational data model supporting tourist profiles, local-guide bookings, vendor listings, and itinerary data.
- Built the initial web application using TypeScript and Firebase, then rebuilt the backend with Supabase, React, and Node.js for improved scalability, using Antigravity to accelerate development.
- Integrated the Gemini API to power a prompt-engineered AI itinerary planner, Razorpay for payments, Google Maps for SOS feature (live location sharing, emergency alerts to contacts, nearest-help lookup), and Supabase for backend services.
- Extended the platform into a 62MB Flutter mobile app with full feature parity, maintaining an average API response time of ~500ms.
- Co-authored “Mahayatri – A Travel Guide Application,” accepted for publication at the DY Patil College Conference 2026.

Urban Carbon Footprint Mapping – Automation Tool | Solo

Mar 2026 – Apr 2026

- Built a Python-based web tool that automated ward-level carbon footprint calculations defined in a published research paper, replacing a fully manual, per-plot formula process.
- Designed an interactive map-click interface using government data sources, cutting calculation time by roughly 5 minutes per location compared to the manual method.

AI Handwritten Notes Summarizer – GenAI Hackathon | Solo

Feb 2026

- Built a fully local pipeline converting handwritten notes to text using Tesseract OCR, then summarizing them with a local LLaMA/Qwen model using Retrieval-Augmented Generation (RAG), achieving ~85% OCR accuracy.
- Placed 11th out of 58 teams in a 6-hour GenAI hackathon.

Leadership & Initiative

ISTE (APCOER)

Jun 2024 – Jun 2025

Secretary

Pune, India

- Led a cross-functional team to execute 5+ large-scale technical events, increasing participation by 30% through resource delegation and targeted promotional strategies.

ISTE (APCOER)

Jun 2023 – Jun 2024

Editor

Pune, India

- Designed visual graphics, posters, and isometric UI/UX components under tight deadlines to support institutional technical campaigns.

Education & Certifications

Anantrao Pawar College of Engineering and Research

Expected 2026

Bachelor of Engineering in Computer Science – CGPA: 8.0/10

Pune, India

Muktangan English School & Jr. College

Jun 2020 – May 2022

Higher Secondary Certificate (HSC)

Pune, India

Certifications: Cybersecurity & Web Deployment (Eduskills / Palo Alto Networks); AI-ML Foundations (Google)

Languages

English (Fluent) Hindi (Native) Marathi (Native) German (B1 –Intermediate)
